

## **Guiding Questions for Data-Driven Parent Meetings, High School Children and Youth Informational Sessions, and MEP Staff Professional Development**

To ensure that the information offered to migratory parents and children and youth, as well as Migrant Education Program (MEP) staff continuously adapts to meet their needs throughout the school year and summer, please consider guiding questions below:

- What ongoing data will be collected and analyzed to determine the effectiveness of the parent meeting/informational session/PD in supporting participants in attaining the session's objective.
- What does the data reveal about the extent to which the skillsets and/or understanding of parents/students/OSY/MEP staff are being meaningfully developed?
- Based on the data, what adaptations should be made to upcoming sessions, and what planning is needed to implement these data-driven adaptations?
- How will the connection between the data and the sessions be shared with participants?
